Webex App | Cisco AI Assistant in meetings

 In this article

 Feedback?

Sometimes you may join a meeting late, need to step away for a moment, or you're multitasking and get distracted. With AI Assistant, you can quickly catch up on what you've missed, understand the discussion, ask questions without disturbing the meeting, and stay on top of the conversation. You also receive a summary and transcript after the meeting, without having to record.

If you can't see the AI Assistant meetings summary feature, contact your organization administrator.

This feature is only available on the Webex Suite meeting platform. To check if you're on this platform and to read about key changes, and forthcoming features, see [more about the Webex Suite meeting platform](#).

If the meeting options are set to the default—Only the host and cohosts can start and stop the summary, participants can send a request to the meeting host, or cohost to start AI Assistant for the meeting.

You can also set AI Assistant to start automatically when you click record during a meeting, or to auto-enable for your scheduled meetings. See [Enable Cisco AI Assistant in meetings](#).

Before a meeting can be recorded, summarized, or transcribed, everyone participating needs to give their consent. This way, you're fully informed and in control of your personal data.

For more information, see [Explicit consent in meetings](#).

In-meeting AI Assistant

Desktop

- ① First, [join your meeting](#).
- ② Go to the meeting controls, and click **AI Assistant** . You see a pop-up notification window, telling you to ask the meeting host or cohosts to start the meeting summary.

If AI Assistant doesn't start automatically at the start of the meeting, the meeting host also gets a pop-up reminder, prompting them to start AI Assistant manually.

The default meeting option is set to **Only the host and cohosts can start and stop the summary**.

If the meeting host or cohosts select **Anyone can start and stop the summary** in the meeting options, click **Start summary** in the pop-up window.

When the meeting summary starts, you receive an audio and visual notification that AI Assistant is active.

- ③ Click **AI Assistant**  in the meeting controls, to hide, or unhide, the AI Assistant panel.

In the panel, choose from:

- **Catch me up**—summary of the last 15 minutes of the meeting.
 - **Summarize more**—select from the last 15 minutes, or from the start of the meeting.
- **Was my name mentioned**—summary of any time someone mentioned your name in the meeting.
- **What are the action items**—summary of action items mentioned in the meeting.
- **Ask AI Assistant**—ask questions about the meeting.

The **Unified Ask AI Assistant** is integrated throughout Webex. You can search for content across Messaging, Meetings, and Calling from anywhere in the app, whether you are navigating your tabs, currently in a meeting, or on a call. So, you can search for content from the ongoing meeting transcript, or retrieve and generate answers from whatever knowledge source you've selected in the AI panel, even during your meeting.

Answers come with highlighted citation links that you can click to go directly to the source, so you can quickly get to specific content for more information.

Any questions you ask and answers you receive are only visible to you, and aren't saved after the meeting.

- ④ The meeting host or cohosts can click **Stop summary** in the AI Assistant panel, or click **AI Assistant**  in the meeting controls and then click **stop summary**, to end the meeting summary for everyone.

If the meeting host or cohosts select **Anyone can start and stop the summary** in the meeting options, you can click **Stop summary** in the AI Assistant panel, to end the meeting summary.

If you start, stop, and restart the meeting summary during a meeting, AI Assistant will not save the segment of the meeting that occurred while the summary was stopped, in the post-meeting summary or transcript.

Whether or not you choose to record a meeting, AI Assistant generates a summary for you. The **post-meeting summary** is available within the meeting history, or the associated meeting recording in the app.

Mobile

- ① First, [join your meeting](#).
- ② Go to the meeting controls, and tap **AI Assistant** . You see a pop-up notification window, telling you to ask the meeting host or cohosts to start the meeting summary.

The default meeting option is set to **Only the host and cohosts can start and stop the summary**.

If the meeting host or cohosts select **Anyone can start and stop the summary** in the meeting options, click **Start summary** in the pop-up window.

When the meeting summary starts, you receive an audio and visual notification that AI Assistant is active.

- ③ Tap **AI Assistant**  in the meeting controls, to open the AI Assistant panel.

In the panel, choose from:

- **Catch me up**—summary of the last 15 minutes of the meeting.
 - **Summarize more**—select from the last 15 minutes, or from the start of the meeting.
- **Was my name mentioned?**—summary of any time someone mentioned your name in the meeting.
- **What are the action items?**—summary of action items mentioned in the meeting.
- **Ask me anything about this meeting**—ask AI Assistant questions about the current meeting.

Any questions you ask and answers you receive are only visible to you, and aren't saved after the meeting.

Tap , or swipe down, to close the AI Assistant panel.

- ④ The meeting host or cohosts can tap **AI Assistant** , and then tap **Stop summary**, to end the meeting summary for everyone.

 If the meeting host or cohosts select **Anyone can start and stop the summary** in the meeting options, you can tap **AI Assistant** , and then tap **Stop summary** to end the meeting summary.

If you start, stop, and restart the meeting summary during a meeting AI Assistant won't save the segment of the meeting that occurred while the summary was stopped, in the post meeting summary or transcript.

AI Assistant settings

[Desktop](#)

Meeting hosts and cohosts can adjust AI Assistant meeting options, to decide who can start or stop meeting summaries, and also decide whether to save summaries and transcripts after the meeting.

- ① In the meeting, go to the AI Assistant panel, and click **AI Assistant settings** .

In the **Meeting options** window, under AI Assistant, select from:

- **Start and stop summary**—choose who can start and stop meeting summaries, select an option in the drop-down list.
 - **Only the host and cohosts can start and stop the summary**—default selected option.
 - **Anyone can start and stop the summary**—choose to allow anyone in the meeting to start or stop the summary.
- **Content availability after the meeting**—choose to save summaries and transcripts after the meeting. Select an option in the drop-down list.
 - **Save summary and transcript**—default option.
 - **Save summary only**
 - **Don't save summary and transcript**

- ② When you've made your selection, click **Apply**.

Meeting summaries and transcripts are saved to the meeting host's account in Webex App. If your meeting is associated with a [space](#) in the app, the links to the summary and transcript automatically appear in that space, where the meeting took place.

If you can't save content after the meeting, contact your administrator.

Meeting hosts and cohosts can adjust AI Assistant meeting options, to decide who can start or stop meeting summaries, and also decide if summaries and transcripts are saved after the meeting.

- ① In the meeting, tap AI Assistant  and then tap Settings .

In the **Meeting options** window, under AI Assistant, select from:

- **Start and stop summary**—choose who can start and stop meeting summaries, select an option from the list.
 - **Anyone can start and stop the summary**
 - **Only the host and cohosts can start and stop the summary**—default option.
- **Content availability after the meeting**—choose to save summaries and transcripts after the meeting. Select an option from the list.
 - **Save summary and transcript**—default option.
 - **Save summary only**
 - **Don't save summary and transcript**

- ② When you've made your selection, tap **Apply**.

Meeting summaries and transcripts are saved to the meeting host's account in Webex App. If your meeting is associated with a [space](#), the summary and transcript link automatically appears in the space where the meeting took place.

If you can't save content after the meeting, contact your administrator, as they may have disallowed this option.

AI Assistant language support

AI Assistant [supports multiple languages](#) for in-meeting and post meeting summaries and transcripts, for more inclusive and engaging meetings.

There's support for 15 spoken languages without requiring a Real-time Translation license. But if you want access to the 120+ caption languages, you'll need to have a [real-time translation license](#).

For customers with a free Webex account, there's support for five spoken languages by default.

- ① Start or join your meeting.
- ② In the pop-up window, select a spoken language in the drop-down list, then click **Set**.

If you didn't set the spoken language at the start of the meeting, or you want to change the spoken language during a meeting, click **⋮ More options** in your meeting controls. Then, click  **Meeting options**, select **AI Assistant > Spoken language for transcript**, select a language in the drop-down list, and click **Apply**.

AI Assistant uses this language when generating the post meeting summary and transcript.

Webex App uses the [language settings](#) that you selected on your device, or browser. AI Assistant provides the in-meeting summary, and responds to your questions in that language, based on your app settings.

For example, if a meeting is conducted in Spanish, but your app language is set to French, AI Assistant provides the in-meeting summary, and responds to your questions in French.

Request AI Assistant meeting summaries

[Desktop](#)

AI Assistant meeting summaries are off by default. Go to the meeting controls and click AI Assistant .

If you can't access the feature, the host may have made permission changes in the meeting options. You receive a notification that only the host or cohost can enable AI Assistant.

Participants can then ask the host or cohost to enable the meeting summary. When AI Assistant is enabled, you receive a notification that the meeting summary has started.

Mobile

AI Assistant meeting summaries are off by default. Go to the meeting controls and tap **AI Assistant** .

If you can't access the feature, the meeting host may have made permission changes in the meeting options. You receive a notification that only the host or cohost can enable AI Assistant.

Participants can then ask the meeting host or cohost to enable the meeting summary. When AI Assistant is enabled, you receive a notification that the meeting summary has started.

Intelligent notifications

Desktop

When the meeting summary is active, AI Assistant sends notifications asking if you want a summary, when you're late, answer a call, or you return from [Stepping away](#) during a meeting.

Meeting attendees

- If you join a meeting late, 12 minutes after the start time, AI Assistant sends a notification asking if you want a summary of the meeting so far.
- When you return to a meeting, after setting your status to [Stepped away](#) for at least one minute, AI Assistant asks if you want a summary of what you missed.
- If you answer a call during a meeting, missing more than one minute of the meeting, AI Assistant asks if you want a summary of what you missed.

Mobile

When the meeting summary is active, AI Assistant sends notifications asking if you want a summary, when you're late, or answer another call.

Meeting attendees

- If you join a meeting late, 12 minutes after the start time, AI Assistant sends a notification asking if you want a summary of the meeting so far.
 - If you answer a call during a meeting, missing more than one minute of the meeting, AI Assistant asks if you want a summary of what you missed.
-

Limitations and Further Resources

AI Assistant meeting summary limitations

- When AI Assistant is available, Webex Assistant for meetings, which provides highlights and voice commands, becomes unavailable.
- Currently, **Ask me anything about the meeting** relates to questions about the meeting context only.
- A new summary will only be prompted if there's sufficient meeting duration to add more information.
- If you select multiple summaries using all the available options in the AI Assistant panel, there may be some summary overlaps, and differences in summary durations.
